Self-propelled Electric Scissor Lifts

HANGCHA self-propelled electric scissor lifts are the high efficient,safe and ideal solution for modern industry. Ideal for maneuvering in tight Spaces,they're excellent for indoor and outdoor application,all the functions, lifting, lowering, steering, forward and backward are under operator's control. Easy maintenance and service after opening the battery cover, all key parts are easy access. With low noise level, and high reliability, HANGCHA self-propelled electric scissor lifts are always your best partner.

Easy/
Efficiency/
Economy

Characteristics

- / The proportional control system:Control the speed Of Traveling and lifting as you need.
- / Control box:This box is including the function Of Traveling and lifting, when you use the joystick, you can Operate the machine With only one hand.
- / Self-leveling sensor. When the degree is more than 1.5° (width direction) /3°(lengthwise direction), it will alarm.
- / LED display: Easy for maintenance.
- / Steering system. The turning radius is small,it can work In the narrow space.
- / Extension deck: You can reach the working place by the Extended platform.
- / Reasonable arrangement: All the parts of hydraulic system and electric system are located In the side doors, convenient to repair.
- / Safety: Alloy steel axis, to make sure the safety, reliable and efficient.
- / Internal charger: You can charge the battery directly, do not need to remove it from machine.
- / Hydrostatic transmission: Using hydrostatic transmission system technology.

Application

- / Stations, dock, airport, powerstation, gym, big company ect.

Standard Equipment

- / The lifting system
- / The proportional control
- / Anti-overturning system
- / Control box
- / Internal Charger
- / Hour meter
- / Local battery

Options

- / Working lights(two lights)
- / 220v socket
- / Beeper
- / Alarm light
- / Anti-overload system(Required by CE)
- / Pneumatic pipe

Traction motor

Supporting arms: To protect the operator when he is doing repair or maintenance job

Explosion proof valve: To prevent the machine falling when the oil pipe is leaking

Manual lowering valve:When the operation system failed or the battery power is too low to let the platform decline, we can use this valve to lower the machine

Manual release valve: When the machine can not move, you can push the machine after pressing this valve

Anti-overturning system: When the machine raises to more than 2m, this system will work automatically, to protect the machine from overturning while walking at un-leveling ground
